## EDUCATION

---

<b>Columbia University</b>	<b>New York, NY</b>	<b>Sep 2021 – Present</b>
Ph.D. in Computer Science	GPA: 4.0 / 4.0	
<b>Columbia University</b>	<b>New York, NY</b>	<b>Aug 2017 – May 2021</b>
B.S. in Computer Science	GPA: 4.0 / 4.0

## HONORS

---

- Avaneessians Doctoral Fellowships for Engineering Thought Leaders and Innovators in Data Science. 2023.
- Mudd Doctoral Fellowship, Columbia SEAS. 2021.
- Honorable Mention, CRA Undergraduate Research Awards. 2021.
- Theodore R. Bashkow Research Award, Columbia Computer Science Dept. 2021.

## INDUSTRY EXPERIENCE

---

### **Microsoft Research**

**Jun 2023 – Sep 2023**

*Research Intern at Deep Learning group*

- Proposed to improve the counterfactual simulatability of natural language explanations by training on augmented counterfactuals. (Ongoing)
- Studied model representations that encode explanation simulatability.

### **Amazon Web Services (AWS) AI**

**Jun 2021 – Sep 2021**

*Research Intern at NLP group*

- Proposed a novel few-shot meta-learning method called in-context tuning, where training examples are used as prefix in-context demonstrations during task adaptation.
- Showed that in-context tuning out-performs MAML in terms of both accuracy and optimization stability.
- Demonstrated that in-context tuning can eliminate well-known artifacts of few-shot language model prompting such as over-sensitivity to example ordering, example selection and instruction wording.

### **IBM Research**

**Jun 2020 – Sep 2020**

*Research Intern at NLP group*

- Explored novel synthetic training methods under the setting of machine reading comprehension.
- Proposed targeted synthetic training where a carefully selected subset of synthetic training examples improves model performance.
- Invented synthetic knowledge distillation and showed that distillation with synthetic training examples can close the performance gap between small student models and large teacher models.

## COURSES

---

Natural Language Processing, Deep Learning, Computer Vision, Machine Learning, Advanced Machine Learning, Algorithms for Massive Data, Randomized Algorithms, Analysis of Algorithms, Computational Learning Theory, Graphical Models, Social Network Analysis, Real Analysis, Abstract Algebra

## TEACHING EXPERIENCE

---

### **Natural Language Processing (CS 4705)**

- Spring 2022: Taught by Prof. Zhou Yu
- Spring 2021: Taught by Prof. Kathleen McKeown

### **Analysis of Algorithms (CSOR 4231)**

- Spring 2021: Taught by Prof. Clifford Stein
- Spring 2020: Taught by Prof. Eleni Drinea

## SKILLS

---

- Programming Languages: Python, Java, MySQL, C, C++
- Tools: PyTorch, HuggingFace, TensorFlow, Keras, Microsoft CNTK, OpenCV, Android Studio
